

OPTI-MUM

CALF MILK REPLACER

1. OPTI-MUM is specifically formulated to optimise skeletal and structural growth for replacement heifers in dairy and beef herds.
2. Contains high quality whey milk ingredients resulting in efficient absorption of the high protein levels.
3. Inclusion of Triple Shield Protection:
 - » Increases the growth of intestinal micro flora.
 - » Reduces the incidence of digestive scours.
 - » Minimises the growth of harmful bacteria including E-coli, Clostridia and Salmonella.
4. Achieves high performance with dairy replacement stock and beef calves in intensive rearing systems.
5. OPTI-MUM is an easy mixing calf milk replacer, ideal for once a day, twice a day feeding, computerised and ad lib calf rearing systems.

Twice a day feeding rates/calf

Days of Age	Morning		Evening	
	Water	Powder	Water	Powder
0-4	Colostrum		Colostrum	
5-10	2 Litres	200g	2 Litres	200g
11-Weaning	2.5 Litres	300g	2.5 Litres	300g

Once a day feeding rates/calf

Days of Age	Morning		Evening	
	Water	Powder	Water	Powder
0-4	Colostrum		Colostrum	
5-8	1.5 Litres	200g	1.5 Litres	200g
9-13	2 Litres	250g	2 Litres	250g
14-16	2 Litres + 400g			
17-20	2.5 Litres + 500g			
21-Weaning	3 Litres + 600g			

With computerised feeding systems, optimal performance is achieved at an inclusion rate of 140g/L.

6. Shelf Life: 18 months from date of manufacture.
7. Available in pallets of 20kg polylined paper bags.
8. Store in a cool dry place.
